

PRESCIENT PROPERTY EQUITY FUND

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund offers efficient and cost effective exposure to listed property as represented by the FTSE/JSE SA Listed Property Index. Tracking error to the index is minimised in the process.

INVESTMENT PROCESS

The Fund is a property index fund where returns are enhanced by taking advantage of low risk arbitrage opportunities in the market. Additional benefits are gained from efficient implementation of cash flows, dividend reinvestments, management of corporate actions and index rebalancing. The Fund aims to remain fully invested in property shares at all times.

WHO SHOULD INVEST

Investors who require exposure to SA listed property shares and who are comfortable with the volatility and potential short term capital losses that can result from exposure to property shares.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

RISK INDICATOR

FUND COMMENTARY

October was another bright month in local and global financial markets. Locally, the JSE SWIX returned 6.5%, resource stocks in the RESI20 index delivered 6.4%, financials (FINI15) did 2.6% and property stocks (SAPY) returned 2%. The greatest contribution to this rally came from the largest stock on the JSE; Naspers. After delivering an astounding 18% in October alone, the stock is now up 72.4% year to date. The MTBPS disappointed the market through a combination of bad economic data, low revenue collection and projections of South Africa's Debt / GDP ratio to reach 60% by 2021. The National Treasury is highly dependent on economic activity to generate tax revenue and the negative trend explains most of the disappointing revenue collection in 2017. Going forward, the fiscal situation of South Africa is highly dependent on a recovery in economic growth. This is unlikely to come from fiscal stimulus or structural policy and we must therefore look to monetary policy or external forces to generate growth in consumer demand.

The Prescient Property Equity Fund returned 2% for the month, in line with the benchmark index. Year to date the Fund is up 10.53%, 0.23% ahead of its benchmark which is up 10.30% over the same period.

Contributors to Performance:

The positions that contributed the most to performance were Nepi Rockcastle (+7.48%), Resilient (+5.83%) and Fortress Income Fund B (+3.61%).

Detractors from Performance:

The largest detractors from performance were Octodec Investments (-11.89%), Redefine Properties (-0.75%) and Fortress Income Fund A (-1.86%).

PRESCIENT PROPERTY EQUITY FUND

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Money Market Funds are priced at 1pm, all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

For any additional information such as fund prices, brochures and application forms please go to www.prescient.co.za

PRESCIENT PROPERTY EQUITY FUND

GLOSSARY

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Current Yield: Annual income (interest or dividends) divided by the current price of the security.

Alpha: Denoted the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.
