

# PRESCIENT EQUITY TOP 40 FUND

## MINIMUM DISCLOSURE DOCUMENT

### INVESTMENT AND RETURN OBJECTIVE

The Fund aims to outperform the FTSE/JSE Africa Top 40 index. Tracking error to the index is minimised in the process.

### INVESTMENT PROCESS

The Fund is an equity index fund where returns are enhanced by taking advantage of low risk arbitrage opportunities in the market. Additional benefits are gained from efficient implementation of cash flows, dividend reinvestments, management of corporate actions, use of future discounts and index rebalancing. The Fund aims to remain fully invested in equities at all times.

### WHO SHOULD INVEST

Investors seeking broad based exposure to the large capitalisation sector of the South African equity market. This Fund is appropriate for investors with a long-term investment horizon.

### RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

## RISK INDICATOR

## FUND COMMENTARY

Markets were very quickly out the starting blocks in 2018, continuing on from where they left last year. In the US, despite a government shutdown occurring intramonth, Trump's tax overhaul plan gathered momentum and sent the Dow Jones Industrial Average to new all-time high levels (+5.79% over the month). Across the Atlantic Ocean, the European Central Bank (ECB) kept interest rates on hold as expected and hinted that their asset buying program could end as early as September this year. European equity markets were not overshadowed by their American counterparts evidenced by the DAX and the CAC40 indices ending 2.10% and 3.19% in the green. In the east, interest rates were also kept on hold in Japan, where the Nikkei rose by 1.46% in January. The CSI300 index in China continued on its merry way to end the month 6.08% up. Risk on was still very much in play with the MSCI Emerging Market index ending January 8.30% higher and beating the MSCI World index (+5.22%) in USD terms.

After being elected as the new president of the ANC, Cyril Ramaphosa was tasked with trying to buoy South Africa's future prospects at the World Economic Forum in Davos, which he seemed to manage with distinction. Another comforting prospect, most of the issues Moody's identified have been or are being dealt with. More specifically, policy reform talks around education and mining, fiscal risks posed by State Owned Enterprises (SOE) as well as attempts to remove the speed bumps in the way of economic growth are key areas being looked at to avoid further downgrades. Ramaphosa acknowledged that government cannot afford a major nuclear program, which is positive to both the 2018 Budget as well as the Moody's ratings review. Amidst the optimism, the resource and industrial boards rose by 3.65% and 0.22% respectively. On the contrary, the financials board lost -2.31% and was hurt by speculation that Capitec had financial irregularities. After being up significantly for the most of January, the JSE All Share index ended flat.

The Prescient Equity Top 40 Fund returned +0.16% for the month, marginally behind the FTSE/JSE Africa Top40 Index (+0.20%).

### Contributors to Performance:

The positions that the contributed the most to the performance of the fund were Anglo American (+13.32%), BHP Billiton (+5.51%) and Compagnie Richemont (+2.67%).

### Detractors from Performance:

The largest detractors from performance were Naspers (-1.99%), NEPI Rockcastle (-24.66%) and Capitec (-27.08%)

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Money Market Funds are priced at 1pm, all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
