

# PRESCIENT GLOBAL POSITIVE RETURN FUND

## MINIMUM DISCLOSURE DOCUMENT

### INVESTMENT AND RETURN OBJECTIVE

The Fund aims to outperform G7 inflation in Euro terms over time while aiming to limit capital losses.

### INVESTMENT PROCESS

The Fund invests in money market instruments, capital market instruments and equities with an active asset allocation overlay. The equity component of the Fund is always protected. The Fund is available in Euro, US dollars, Sterling and Rand where the currency risk is hedged back to the pricing currency to reduce currency volatility.

### WHO SHOULD INVEST

Investors seeking a hedge against any rand depreciation while gaining exposure to a risk aware asset allocation offshore fund. This Fund is suitable to investors with a medium to long-term investment horizon.

### RISK INDICATOR DEFINITION

These portfolios typically have moderate equity exposure or in the case of bond funds, longer duration bond exposure, resulting in some capital volatility over the shorter term. They are managed in such a manner that the probability of capital losses over one year periods is unlikely. These portfolios typically target returns in the region of 3% - 4% above inflation over the long term.

## RISK INDICATOR

ANNUALISED PERFORMANCE (%)			RISK AND FUND STATS		
	Fund	Benchmark	Since inception (p.a.)		
	Fund	Benchmark		Fund	Benchmark
1 year	-0.37	2.31	Alpha	1.42%	
3 years	-0.50	1.56	Sharpe Ratio	-0.62	-2.11
5 years	1.29	1.74	Standard Deviation	3.98%	1.84%
Since incep.	3.59	2.17	Max Drawdown	-7.98%	-1.61%
Highest rolling 1 year	15.97	3.99	Max Gain	4.44%	
Lowest rolling 1 year	-7.18	0.43	% Positive Months	60.58%	

\*Please note name change from Global Positive Return Euro Fund to Global Positive Return on 1 Jan 2017

## FUND COMMENTARY

The Global Positive Return Strategy squared with the MSCI World index in August, which ended the monthly relatively flat. Owing to attractive valuations, easy monetary policy and a recovering economy, Europe remains our top choice from a regional point of view. In addition, we favour Japan, as that economy has begun to benefit from extraordinary expansive monetary policy and fiscal stimuli. We remain underweight the UK as well as the US. The former still has to stomach the aftermath of Brexit, while the latter is trading at stretched valuations, in an environment of monetary tightening and a business cycle that has entered its last stage. Focusing on emerging economies, we have persisted with our off-benchmark bet to China. The Fund remains short duration on German and US Government bonds. Exposure is obtained synthetically through options and futures, as volatility trades at all-time lows. No active currency positions are in place.

**Contributors to performance:** Exposure to credit as well as our income positions added value. Contributions stemming from equity exposure were neutral as the market traded flat for the month. The same holds true for our equity derivative overlay.

**Detractor from performance:** Our short duration positions detracted value since interest rates moved lower across the globe. Our overweight to Europe detracted value in August as well.

## DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Money Market Funds are priced at 1pm, all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

## GLOSSARY

**Annualised performance:** Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

**Highest & Lowest performance:** The highest and lowest performance for any 1 year over the period since inception have been shown.

**NAV:** The net asset value represents the assets of a Fund less its liabilities.

**Current Yield:** Annual income (interest or dividends) divided by the current price of the security.

**Alpha:** Denoted the outperformance of the fund over the benchmark.

**Sharpe Ratio:** The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

**Standard Deviation:** The deviation of the return stream relative to its own average.

**Max Drawdown:** The maximum peak to trough loss suffered by the Fund since inception.

**Max Gain:** Largest increase in any single month.

**% Positive Month:** The percentage of months since inception where the Fund has delivered positive return.
