

PRESCIENT GLOBAL POSITIVE RETURN FUND

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund aims to outperform G7 inflation in Euro terms over time while aiming to limit capital losses.

INVESTMENT PROCESS

The Fund invests in money market instruments, capital market instruments and equities with an active asset allocation overlay. The equity component of the Fund is always protected. The Fund is available in Euro, US dollars, Sterling and Rand where the currency risk is hedged back to the pricing currency to reduce currency volatility.

WHO SHOULD INVEST

Investors seeking a hedge against any rand depreciation while gaining exposure to a risk aware asset allocation offshore fund. This Fund is suitable to investors with a medium to long-term investment horizon.

RISK INDICATOR DEFINITION

These portfolios typically have moderate equity exposure or in the case of bond funds, longer duration bond exposure, resulting in some capital volatility over the shorter term. They are managed in such a manner that the probability of capital losses over one year periods is unlikely. These portfolios typically target returns in the region of 3% - 4% above inflation over the long term.

RISK INDICATOR

ANNUALISED PERFORMANCE (%)			CUMULATIVE PERFORMANCE		
ANNUALISED PERFORMANCE (%)			RISK AND FUND STATS		
	Fund	Benchmark	Since inception (p.a.)		
1 year	3.67	2.30		Fund	Benchmark

5 years	1.89	1.71	Sharpe Ratio	-0.58	-2.15
Since incep.	3.81	2.14	Standard Deviation	3.91%	1.83%
Highest rolling 1 year	15.97	3.99	Max Drawdown	-7.98%	-1.61%
Lowest rolling 1 year	-7.18	0.43	Max Gain	4.44%	
			% Positive Months	61.82%	

*Please note name change from Global Positive Return Euro Fund to Global Positive Return on 1 Jan 2017

FUND COMMENTARY

Global markets sold off in February and nervousness as well as volatility entered markets. As such, the Fund maintained its cautious stance on equities owing to stretched valuations, monetary policy tightening as well as the late stage of the business cycle. Nevertheless, the Fund remained overweight European equity vs US equity, primarily due to the more advanced stage of the US monetary policy tightening cycle. Moreover, nominal interest rates globally have remained low meaning negative real interest rates prevailed. Coupled with this, as Fed are expected to become sellers of treasury bonds from being net buyers for an extended period of time, the Fund persisted with its position of short global interest rate exposure. At the same time, corporate leverage has reach elevated levels around the globe when spreads have been at record low levels. This has resulted in a somewhat circumspect stance taken on credit. Meanwhile, volatility ticked higher, which allowed for a reduction in duration on the hedge position.

Contributors to performance: Equities (overweight Europe) and the short interest rates position.

Detractor from performance: Cautious positioning in credit.

PRESCIENT GLOBAL POSITIVE RETURN FUND

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Money Market Funds are priced at 1pm, all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
