

PRESCIENT GLOBAL EQUITY FUND

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund is an actively managed global equity fund that aims to outperform MSCI World Index by 0.75% to 1% p.a. over time.

INVESTMENT PROCESS

The Fund is usually fully invested in equities and is structured to minimise the risk of underperforming the benchmark by investing in a diversity of risk premia and blending those strategies to reduce relative market risk over time.

WHO SHOULD INVEST

Investors seeking growth and protection against rand depreciation through a benchmark aware global equity fund. This Fund is suitable to investors with a long-term investment horizon.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

FUND COMMENTARY

The equity markets struggled to continue with the positive sentiment seen through the duration of 2017 and ended the quarter lower by 1.28%, the fund lost 2.82% during the first quarter. This negative move is the first quarterly loss in the MSCI world index in two years with the MSCI index a -0.35% return for the first quarter of 2016. The equity market in the first quarter has struggled to find direction and after a strong start to the year in January investors have become extremely cautious as they grapple with worries over high stock valuations, the changing of the guard at the Federal Reserve and proposed policy amendments by the Trump administration regarding the implementation of trade tariffs against Chinese imports into the US. This seems to be escalating into a trade war between the two countries, neither of which seem to want to back down from the damaging rhetoric. The MSCI Emerging Markets index ended March -2.03% in the red whilst developed markets didn't escape the pain as the MSCI World index ended -2.20% down.

Moody's meanwhile, injected a sense of relief into the domestic market by keeping SA one notch above sub-investment grade and lifting their outlook for SA sovereign debt from negative to stable. The 10Y South African bond rallied to close the month at 7.99% (having fallen 0.60% over the quarter). On the contrary, SA equities could not manage to escape the global sell off as the JSE All Share index closed -4.18% in the red for March and -5.97% down for the quarter. **Contributors to performance:** Globally, the France and Italy contributed positively whilst the only sectors that contributed positively to performance over the quarter were the defensive sectors of Consumer Staples, Energy and Tel Coms. **Detractors from performance:** From a sector perspective Consumer Discretionary, Financials, Health Care, Industrials, Information Technology and Materials all ended the quarter negatively

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Money Market Funds are priced at 1pm, all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
